

Introduction to Computer Science and Programming

::Individual Project (50%)

Due: 11:59 PM, Monday, 30 Sep 2021

Email to: vu.tran@vnuk.edu.vn, thien.nguyen@vnuk.edu.vn

According to the VN-UK Academic integrity policy, plagiarism is:

"Claiming and using the thoughts or writings or creative works of others without appropriate acknowledgement or attribution. It includes:

- (a) copying part or all of another student's assignment;*
- (b) allowing another person to write some or all of an assignment;*
- (c) copying paragraphs, sentences or parts of sentences directly from texts or the internet without enclosing them in quotation marks or otherwise showing them to be copied - even if the source is acknowledged, this is still plagiarism;*
- (d) using concepts or developed ideas, even if paraphrased or summarised, from another person, from texts or the internet without acknowledging the source;*
- (e) copying graphics, architectural plans, multimedia works or other forms of intellectual property without appropriate acknowledgment."*

The consequences of plagiarism (depending on the seriousness of the case) range from reducing your mark or failing the assignment up to a formal reference to a summary inquiry:

<p><i>By signing below I certify that the attached assignment is my own work.</i></p>		
<p>Student ID:</p>	<p>Student Name:</p>	<p>Signature:</p>

Grade:

No.	Question	Grade
1	Question 1	
2	Question 2	
3	Question 3	
4	Question 4	

5	Question 5	
	Total	

This problem set will introduce you to using control flow in Python and formulating a computational solution to a problem.

Questions.

1. Choose your input data: (2pts)

Ví dụ: trong challenge 1, có input data là 3 files csv

trong challenge 2, có input data là một file hình ảnh bài làm trắc nghiệm

2. Create 1 problem statement and 10 questions for the input data (ranking from easy to difficult): (3pts)

Tạo ra 10 hỏi hợp lý giải quyết vấn đề và định nghĩa vấn đề liên quan tới dữ liệu, tham khảo cách đặt câu hỏi trong challenge 1 và challenge 2

3. Solve your 10 questions (3pts)

4. Coding style (1pts)

5. Github (1pts)
